This is Why Biker Shorts are Making It Big In The Fashion World!

Biker shorts have been a major styling inspiration since Princess Diana wore them for her gym back in the 1990s. Hailey Bieber, Kim Kardashian West, Bella Hadid, Maddison Beer, and Kendall Jenner have been seen often pairing biker shorts for their casual outings. The look is very comfortable and a major part of street-wear fashion. Let's see how our favorite fashion idols have worn this look and this can be very inspiring if you wish to try this trend!

With an Oversized Tee, biker shorts make for the most trendy and in vogue look. This is super comfortable and also summer-appropriate as it is breezy and light. As Hailey Bieber can be seen pairing it with a basic oversized tee, she also re-creates Princess Diana's iconic look to make it to the fashion charts.

Pairing biker shorts with a cropped hoodie, or an oversized vibrant colored hoodie is also a very way to style these shorts among various celebrities. Kendall Jenner was seen wearing it with a cropped loose hoodie and Selena Gomez was spotted in a vibrant one that had a loose fit. Kendall even paired black heels with it, to make it look chic and less casual.

One of the most iconic looks of Bella Hadid, when she paired her black biker shorts with a blazer, has been a major style inspiration for many stylists. The way she made the entire look so fashionable and high-end got her a lot of praise. Ever since then, pairing these shorts with long coats is super popular and chic.

Because of the versatility of biker shorts, this simple clothing item can be used to create so many looks and outfits. The basic color tones can be paired with multiple tees and camisoles and paired with shoes or sneakers, you're all set to make an impression!

Office Attires For Men

Men do not really have many options when it comes to formal wear as much as women do. Men are always in a dilemma, what could they possibly do with their formal look to make them different from others? While guys mostly complain when they see so many clothing options for women to choose from, they are envious of women as well because of the same reason and also because of the limitation that is present when it comes to male outfits.

Here are the ideas which you can mix and match and take a hint on how to dress for your workplace.

Black Shirt with Grey Blazer

It is a great combination which gives off a classy feel. Combine it with grey pants or blue jeans if it's allowed in your work environment, and you are ready to go to the workplace with your smart casual look.

Turtleneck with Long Coats

Winter does not bring many choices for men other than protecting themselves from the harsh environment while looking good, which should also be our priority. Turtlenecks can be combined with long coats or blazers, and combining them with formal black shoes or boots will complete the look.

Thin Sweaters with Shirts

When winters have come to an end and the summer starts approaching, the temperature is quite neutral. Wear thin sweaters outside shirts, combined with formal pants and shoes, and you're ready to go.

Striped Shirts

Striped shirts go well with any kind of body proportion in men. It adds symmetry to the outfit and gives off a smart vibe. Black and white are preferred colors, however blue and pink go well together too.

Navy Blue Suit with a Light Blue Shirt and Emerald Green Tie

For a special occasion in the office or on the day of your promotion, you can try this look. Navy-blue complements emerald green well, or you can opt for a maroon tie as well.

So, what are you waiting for? Make everybody turn their heads when you arrive at your workplace with these attires, and give yourself a smart and intellectual appeal with these outfits.

How to tame frizzy hair

Does the coming of each new season or unforgiving items make your hair fuzzy? Indeed, none of you can get away from hair frizz once in a while. Notwithstanding, if the frizz is making your hair unmanageable, or you need milder hair for that large occasion, this article is for you.

Continue to look to know how you can oversee crimped hair and turn it smoother and shinier.

While choosing a shampoo, search for items with Glycerin recorded high up on the fixing list. The nearer glycerin is leaned to the top, the more packed it is in the item.

Glycerin assists battle with frizzing by infiltrating the hair and hydrating it from the back to front. It is likewise an incredible humectant, which means it ingests that additional dampness noticeable all around, making a defensive covering and keeping dampness caught in.

Notwithstanding glycerin, guarantee the cleanser you're utilizing is without sulfate. Sulfates are a shockingly basic fixing in cleanser since it makes a foam.

The power of a decent conditioner is frequently belittled. Guarantee you use conditioner each time you cleanse your hair to keep the fingernail skin hydrated, so dampness can infiltrate profound into each strand.

This keeps the fingernail skin from opening up and allows in abundance of dampness from the climate, which will keep it smooth. While looking for a conditioner, search for an item that contains glycerin, just as other hydrating fixings like shea margarine. Make certain to apply conditioner from the mid-lengths down to your finishes and get it far from your underlying foundations to forestall sickness.

You may think your hair should be shampooed a few times each week, yet as a general rule, it really doesn't. Like clockwork, apply conditioner just and skip cleanser, at that point flush it out. The conditioner contains a limited quantity of surfactant, which is the thing that cleanser uses to scrub your hair.

Too, conditioners contain a modest quantity of oil which appends to the oils in the hair, purifying it away. This likewise called "Co-Washing" helps keep the hair at ideal PH as you are renewing dampness and guaranteeing the common oils in your hair are not being stripped away.

On the off chance that you actually can't kick the frizz once your hair is blow-dried, take a stab at utilizing a supporting hair oil. Hair oil attempts to battle frizz by streamlining the hair while at the same time adding sparkle and sparkle.

It infiltrates profound into the hair fingernail skin to add dampness to dry finishes and revive the wellbeing and dynamic quality of your braids. Drop 1-3 drops of oil onto your palm, rub together and smooth over the finishes of the hair to tame flyaways and frizz.

In spite of the fact that it generally feels like warmth instruments tame frizz and boisterous hair once the hair is styled and smooth, the inverse really occurs in case you're utilizing your warmth devices on an excessively high setting.

Anything over 365 degrees can possibly grow the fingernail skin, which will really wind up accomplishing more damage than anything else. A protected reach for your warming apparatuses is 250 to 300 degrees to guarantee insignificant harm. Having tolerance and holding the hair on the device longer as opposed to only amping up the warmth will really make a sleeker, sans frizz look eventually.

Everyday college make-up for a fresh look!

College time is super exciting and fun. Every day is a new journey in itself and time spent with friends is priceless. Dressing up for college these days has changed incredibly in comparison to earlier times. Girls now keep up with the trends and the strict dressing rules are now starting to fade away.

With styling your outfit and hair, it's extremely important to prep your face and skin so that it looks fresh and bright throughout the day. Being outside in the sun, travelling on public transport and attending the classes until evening can leave you looking tired and dull. Here is what you can do to get that fresh face –

Start with cleansing your face with a cleanser or face wash that suits your skin. The next step is applying a light moisturizer that is not heavy or greasy. Once that is absorbed by the skin, take a generous amount of sunscreen and apply it. Make sure the sunscreen has an SPF of at least 40. You can use the ones that have SPF as well as UVA/UVB Protection.

Once your skin is prepped up, use a BB cream or a CC cream. BB creams are perfect for light makeup looks and are ideal to be used for everyday light makeup. If you want a finer look, you can build it up and if you only want to hide a few spots, it can be used as a concealer too.

Once the base is done, the next is the eyes. For college, eye-makeup should be minimal. You can add a bold black kajal and mascara for everyday wear. If you are an eyeliner girl, black eyeliner is most suitable. To experiment, you can even use blue or green eyeliner as well.

To add more dimensions to the face, blush is a must! It gives you that bubbly-blushing look that looks adorable. Peaches and Light Pink blushes are perfect to achieve that fresh face look and will make your skin look glowy. Coral Blush is also a great choice to achieve the same.

Lastly, lipstick is every girl's favorite. Nude pinks and warm tones give you an innocent charm. They look subtle and are best for everyday wear. Dark colors should be avoided as they give your face a bold and heavy look that is more suitable for festive and rare occasions.
