One tip is to find a budget hotel can be very hectic if you reach Bali once, so we advise you to book a hotel in advance before reaching Bali, prices can be sky-high, and just hunt down a place where you can sleep comfortably or take a bath and look for hygiene, there is no need for television, fridge, or jacuzzi because you'll be traveling or exploring all day.

### **Use a scooter as a ride**

Be a driver of your own in Bali because Bali won't really provide you with good transport, and you'll be dependent on the driver to pick and drop you at the places, so rent a scooter and explore on your own and go wherever you want to go and make sure not to rent a scooter without a helmet.

### **Bluebird taxis**

Look out for bluebird taxis when you are at the airport because taxis at the airport range from high to low prices and the irony is that the service and facilities are all the same independent of the prices, bluebird taxis are metered taxis which charge you depending on the miles you're traveled and will surely help you to save a little.

### **Keep cash**

Shops and other places in Bali really don't accept cards so if you wanna shop all over, please keep cash with you as it can be helpful at times when you want to buy a thing you really like and if the sad part turns out to be they don't accept cards, there are ATMs at the airport so the first thing to do is to take cash.

## Bonus

Don't visit famous and crowded places

Everyone will be visiting some A-listed places in Bali and does make the place expensive and crowded and the sad part even after spending so much money won't be able to enjoy it, so go to some less discovered places because Bali is beautiful everywhere.
